Hi all,

With the *Uinta Basin* UPA Lunch and Learn coming up (3 hours after this mtg. 🤖) and with UDAQ submitting their technical analysis for a 179B(b) demo at the end of the month, Scott and I thought it would be a good idea to brief y'all on where things currently stand with Utah ozone planning and talk through some likely scenarios depending on 2022 ozone values in the basin.

Please note: I have been coordinating with UPA, UDAQ, Ute Tribe, Mike Boydston, Mike Gleason, and Scott on appropriate talking points for Tuesday's L&L and I feel I have a good sense of what questions I will be asked and what I am (and am not) allowed to say. I would be happy to walk through these with y'all on this call if preferred.

Thx,
~A
